Where: LEEP (Spahr)  
Time: 3:00 PM  
Present Members: Timo, Allie, Riley

## Notes

### Discussion:

Victor has been trying to work on the code. We do not know how far he is and if we will be able to use his code. We need to determine if we will use it now because our Software Architecture document depends on knowledge of how we want to implement things. We might have to quickly pivot from his code if it turns out not much has been done and/or it isn't sufficient.

### Decisions:

- We need to talk to Victor
  - How far is he?
  - How does the code work?
  - Does his code use a data structure
- If he doesn't get back to us, we will have to move without him

### We will need to ask Saiedian some questions:

- No questions to ask today

### Photos taken during the meeting:
