Jayhawks
9-21-2023
Timo A. Aranjo

Where: LEEP (Spahr)
Time: 4:00 PM
Present Members: Timo, Allie, Riley, Victor, Ellia

Notes

Allie talked to Saiedian after class:

- We can keep examples if they work as is
- Configuration manager is supposed to do the Github stuff

Decisions:

- Timo will start CC'ing everyone in emails
- We will meet again tomorrow if possible

We will need to ask Saiedian some questions:

- For 2.4, do we need a table of proposed versions?
- For 2.3, do we need to create a list of objectives or just a reference to 4.2.4?
- Is 4.2.4 the same as 4.2.2?
- Is 2.1 deliverables the operations or project parts?
- For 4.2.3, what releases do we need to put the project parts or the operations?
- 4.3 do we include the 4.4 and 4.6?
